

AI Mind

Brand Identity Guidelines

A personal learning notebook for AI history. Where curiosity becomes knowledge, and knowledge becomes understanding.

BRAND GUIDELINES

Version 1.3 | 2026

Brand Essence

Scholar's Notebook Meets Interactive Knowledge Graph

AI Mind is a personal learning notebook where users chat with an AI tutor while reading papers. Every discussion transforms into a timeline graph of papers, concepts, and connections. Over weeks and months, this graph becomes a unique, private map of how each user understands artificial intelligence.

VISUAL IDENTITY PHILOSOPHY

The visual identity reflects **clarity, warmth, and intellectual depth**. Every design decision prioritizes **graph readability first, beauty second** — the interface serves the user's ability to understand and explore their knowledge.

CORE DESIGN COMMITMENT

This is not just a design system. It's a commitment to making complex knowledge accessible, beautiful, and personal. The visual identity supports users in their learning journey without distraction or intimidation.

Primary Color Palette

Three foundational colors that work together to create a warm, scholarly aesthetic

Warm Off-White

HEX CODE

#F5F1E8

RGB

245, 241, 232

USAGE

Primary background color. Reduces eye strain and creates a warm, scholarly feel.

Deep Navy

HEX CODE

#1A2332

RGB

26, 35, 50

USAGE

Primary text and dark mode background. Provides high contrast for readability.

Muted Terracotta

HEX CODE

#A67C52

RGB

166, 124, 82

USAGE

Warm accent color for buttons, highlights, and interactive elements.

Secondary & Graph Colors

SECONDARY COLORS

Soft Sage

HEX
#7A9B7F
USAGE

Secondary accents

Warm Gray

HEX
#8B8680
USAGE

Muted text

Light Cream

HEX
#FDFBF7
USAGE

Cards & containers

GRAPH-SPECIFIC COLORS

Two-Mode Color System

Light and Dark modes for optimal readability across all environments. No additional themes or customization.

Light Mode (Default)

	Background #F5F1E8 OFF-WHITE
	Text #1A2332 DEEP NAVY
	Accent #A67C52 MUTED TERRACOTTA
	Secondary #7A9B7F SOFT SAGE

Dark Mode

	Background #0F1419 DEEP BLACK
	Text #E8E6E1 LIGHT CREAM
	Accent #D4956B WARM TERRACOTTA
	Secondary #7A9B7F SOFT SAGE

IMPORTANT

AI Mind supports exactly two modes: Light (default) and Dark. No additional theme variations, accent pickers, or user-customizable color packs are supported. This constraint ensures cognitive continuity and design consistency across all user contexts.

Logo System

AI Mind

Interconnected Circles Representing Knowledge Growth

The AI Mind logo consists of interconnected circles of varying sizes arranged organically to suggest a knowledge graph. The circles represent papers, concepts, and connections — the core elements of the learning journey.

- **VARYING SIZES**
Circles of varying sizes represent different types of nodes (papers, concepts, people)
- **CONNECTING LINES**
Subtle connecting lines suggest relationships and edges between concepts
- **ORGANIC ARRANGEMENT**
Natural, non-geometric layout reflects the natural flow of learning
- **WARM COLOR PALETTE**
Warm terracotta as primary color; soft sage as secondary accent

Logo Variations

Flexible System for Every Context

PRIMARY LOGO (FULL)

Main branding, website header, documents. Minimum 120px width. Symbol on left, wordmark on right.

LOGO MARK ONLY

Favicon, small applications, app icons. Minimum 32px width. Symbol without text.

HORIZONTAL LOCKUP

Navigation bars, headers. Symbol positioned left of wordmark for optimal readability.

STACKED LOCKUP

Business cards, vertical spaces. Symbol positioned above wordmark for compact layouts.

MONOCHROME VARIATIONS

White on dark, black on light, terracotta on off-white, sage on off-white for different backgrounds.

Typography System

The typography system uses **Inter**, a modern geometric sans-serif designed for excellent readability at all sizes. Inter's strong character distinction and clean proportions make it ideal for both interface text and graph labels.

Font Weights

400 (Regular)

Body text, secondary information, and standard content

500 (Medium)

Labels, graph annotations, and emphasized secondary text

600 (Semi-bold)

Subsections, emphasis, and secondary headings

700 (Bold)

Headings, primary hierarchy, and key information

The typography scale establishes clear hierarchy from page titles through body text to small captions. Each level maintains generous line-height for readability and comfortable reading experience.

Typography Hierarchy

Page Title

H1
48px
700 Bold
1.1 LH

Section Title

H2
32px
700 Bold
1.2 LH

Subsection

H3
24px
600 Semi-bold
1.3 LH

Regular paragraph text showing line height and spacing for comfortable reading.

BODY
16px
400 Regular
1.6 LH

400 Regular
1.4 LH

HIERARCHY PRINCIPLES

The typography scale creates visual structure that guides users through content. Each level maintains generous line-height for comfortable reading and clear distinction between hierarchy levels.

READABILITY FIRST

All typography choices prioritize readability. Minimum font size is 12px, line-height is at least 1.4, and maximum line length is 75 characters for optimal reading comfort.

CONSISTENCY

Use this hierarchy consistently across all pages and contexts. Never deviate from these specifications to maintain visual harmony and user familiarity.

LH = Line Height

Generous line-height ensures comfortable reading and visual breathing room between lines of text.

Visual Elements

The knowledge graph is the heart of AI Mind. All visual design supports **graph clarity and readability**. Paper nodes as timeline cards, concept chips as satellites, and connection styling work together to create an intuitive, readable interface.

NODE STYLING

Paper Nodes
Timeline cards (70x50px) in terracotta. Primary content containers in the graph.

Concept Chips
Satellite circles (45px) in sage green. Associated with paper nodes.

Person Satellites (Future)
Small circles (35px) in warm gray. Future enhancement, not part of current MVP.

Hover State
Slight scale increase, enhanced shadow for interactivity.

Selected State
Bright outline (3px) with accent glow for focus.

CONNECTIONS & STATES

Default Edge
2px width, tan color at 60% opacity. Subtle connection.

Hover Edge
3px width, accent color, 100% opacity. Highlights relationship.

RELATIONSHIP LABELS

12px Inter, warm gray, positioned at edge midpoint for clarity.

ANIMATION

Subtle pulse on new connections; smooth transitions on state changes.

CORE PRINCIPLE

Every visual element serves graph readability. Paper nodes are prominent and clear. Concept satellites provide context. Connections are subtle but visible. Interactive feedback is immediate and intuitive.

Cards and Interactive Elements

Cards and buttons maintain **visual consistency** while supporting content hierarchy. Components work seamlessly across light and dark modes.

LIGHT MODE COMPONENTS

Card Design

Card Title

This is a card component with light cream background and subtle border. Used for grouping related content.

Background: #FDFBF7 · Border: 1px #D4C4B8 · Padding: 12px

Button Styles

Primary Button

Primary Button

Terracotta background, off-white text. Used for main actions.

Secondary Button

Secondary Button

Transparent background, terracotta border. Used for alternative actions.

BUTTON SPECIFICATIONS

Padding: 12px × 24px

Border Radius: 6px

Font: Inter 600

DARK MODE COMPONENTS

CARD EXAMPLE

Card in Dark Mode

Cards adapt to dark mode with darker backgrounds and lighter text, maintaining hierarchy and readability.

BUTTON EXAMPLES

Primary

Secondary

COLOR MAPPING

Background: #1A2332

Text: #E8E6E1

Accent: #D4956B

IMPLEMENTATION NOTE

All components maintain visual consistency across light and dark modes. Colors are chosen to ensure contrast and readability.

Spacing and Layout System

8PX BASE UNIT SCALE

- xs (Extra Small)
4px
- sm (Small)
8px
- md (Medium)
16px
- lg (Large)
24px
- xl (Extra Large)
32px
- 2xl (2x Extra Large)
48px

SPACING PRINCIPLE

The 8px base unit ensures **visual consistency** and **predictable spacing** across components and layouts.

RESPONSIVE GRID SYSTEM

DESKTOP (1280PX+)

12-column grid with 32px padding and 1280px max-width

TABLET (768PX - 1279PX)

8-column grid with 24px padding and 768px max-width

MOBILE (< 768PX)

4-column grid with 16px padding and 100% width

RESPONSIVE PRINCIPLE

The grid system adapts to different screen sizes while maintaining **visual hierarchy** and **content readability** across devices.

Accessibility Standards

AI Mind's visual identity meets rigorous **WCAG AA accessibility standards** to ensure all users can read and interact with the interface comfortably.

COLOR CONTRAST (WCAG AA)

Terracotta on Off-White

Terracotta Text

Ratio: 5.2:1 ✓

Navy on Off-White

Navy Text

Ratio: 9.1:1 ✓

Sage on Off-White

Sage Text

Ratio: 4.8:1 ✓

Light Text on Dark

Light Text

Ratio: 8.4:1 ✓

MOTION & ANIMATION

✓ **Respects Preferences**

Animations respect prefers-reduced-motion.

✓ **Duration Limits**

Max animation duration: 300ms.

✓ **Natural Easing**

Uses stronger, intentional easings.

✓ **No Flashing**

No flashing or strobing effects.

✓ **Predictable**

Motion is predictable and non-distracting.

TYPOGRAPHY STANDARDS

✓ **Minimum Size**
12px for readable text

✓ **Line Height**
Min 1.4 for comfortable reading

✓ **Line Length**
Max 75 characters

✓ **Font Choice**
Inter for clear distinction

✓ **Contrast**
Sufficient contrast across text

COMMITMENT TO ACCESSIBILITY

Accessibility is built into the AI Mind visual identity. Design choices consider users with different abilities, preferences, and environments to ensure inclusivity and usability.

Design Principles

Six core principles guide all design decisions for AI Mind. These principles ensure the visual identity stays true to its mission while maintaining consistency and clarity.

1

Graph First

Every design decision serves the knowledge graph.
Visual elements support, never distract from, the core interface.

2

Readability Second

Beauty supports clarity, never competes with it.
The interface prioritizes user understanding above decoration.

3

Warmth Always

Use warm colors and soft edges throughout.
The scholarly aesthetic should feel inviting and connected.

4

Consistency

Maintain visual harmony across all touchpoints.
Predictable design builds user confidence and reduces cognitive load.

5

Accessibility

Design for all users, including those with visual impairments.
Contrast, typography, and motion support inclusive experiences.

6

Two-Mode Only

Support exactly Light and Dark modes for consistency.
No additional theme variations. Two modes ensure cognitive continuity.

GUIDING PHILOSOPHY

These six principles work together to create an interface that feels both **professional and welcoming**, supporting users in their learning journey.

Brand Voice & Tone

The visual identity should feel **scholarly, warm, clear, and timeless** throughout all applications. These qualities create an interface that feels both professional and welcoming.

Scholarly

Intellectual, well-researched, authoritative — reflecting the serious study of AI history.

- Precise typography and careful spacing convey expertise
- Muted color palette suggests academic rigor

Warm

Inviting, human, approachable — making complex topics accessible and comfortable.

- Warm off-white background reduces eye strain
- Terracotta and sage accents feel natural and organic

Clear

Focused on readability and understanding — never sacrificing clarity for decoration.

- High contrast ensures text is always readable
- Consistent hierarchy guides users through content

Timeless

Not trendy, built to last — the visual identity should age gracefully over years.

- Classic color palette won't feel dated in 5 years
- Geometric logo design is inherently timeless

BRAND MANIFESTO

*These qualities combine to create an interface that is **professional, welcoming, and purposeful**. The visual identity supports users in their learning journey — clear, accessible, and built to last.*

Implementation Guidelines

These practical guidelines ensure **consistent brand application** across design contexts. Follow these rules to maintain visual integrity while adapting to different media.

LOGO USAGE

Clear Space	Min: 16px
Minimum Size	Desktop 48px · Mobile 32px
Color Variations	Light / Dark
Never Modify	Use provided files

COLOR USAGE

Primary Color	#A67C52
Secondary Colors	#7A9B7F · #8B8680
Dark Mode Accent	#D4956B
Avoid	No neon / gradients

TYPOGRAPHY

Font Family	Inter
Font Weights	400 · 500 · 600 · 700
Line Height	Body 1.6
Letter Spacing	Labels 0.05em

IMAGERY

Photography	Warm, natural
Illustrations	Minimal · geometric
Icons	2px stroke
Avoid	No watermarks / filters

✓ DO THIS

Use approved palette · Maintain clear space · Keep typography consistent · Test accessibility

✗ DON'T DO THIS

Mix fonts/colors · Stretch logo · Use trendy effects · Ignore contrast

IMPLEMENTATION SUPPORT

Refer to the **six core design principles**: Graph First, Readability Second, Warmth Always, Consistency, Accessibility, and Two-Mode Only.

Dark Mode Implementation

Dark mode is implemented using **CSS custom properties and JavaScript** to toggle schemes, ensuring smooth transitions and respecting system preference.

COLOR MAPPING

Light Background
#F5F1E8

Dark Background
#1A2332

Text Colors
#1A2332 (Navy)
#E8E6E1 (Off-white)

Accent
Light: #A67C52
Dark: #D4956B

BEST PRACTICES

- 1

Respect System Preferences

Use prefers-color-scheme to auto-apply on first load.
- 3

Persist Choice

Save selection to localStorage for persistence.
- 5

Consistent Platforms

Align behavior across web, mobile, and desktop.

CSS VARIABLES

Define in :root

```
:root { --bg-primary: #F5F1E8; --text-primary: #1A2332; --accent: #A67C52; }
.dark { --bg-primary: #1A2332; --text-primary: #E8E6E1; --accent: #D4956B; }
```

Usage

```
body { background: var(--bg-primary); color: var(--text-primary); }
```

IMPLEMENTATION CHECKLIST

✓ Define CSS variables · ✓ Create .dark class · ✓ Add toggle · ✓ Detect system preference · ✓ Save user preference · ✓ Test contrast · ✓ Verify transitions

Implementation Quick Spec

COLOR TOKENS

Light Mode

Background	#F5F1E8
Text	#1A2332
Accent	#A67C52

Dark Mode

Background	#0F1419
Text	#E8E6E1
Accent	#D4956B

Typography

Font Family	Inter
Heading	600-700
Body	400-500

Spacing

Base Unit	8px
Scale	4, 8, 16, 24, 32, 48px
Border Radius	4px (cards), 50% (circles)

GRAPH NODE STATES

Paper Node
70x50px, terracotta, primary

Concept Chip
45px circle, sage green

Edge States

Default: 2px, #C9B8A8, 60% opacity
Hover: 3px, #D4956B, 100% opacity

DO'S & DON'TS

Do Use Light/Dark modes only	Don't Add custom themes or accent pickers
Do Prioritize graph readability	Don't Use circular bubbles for papers
Do Maintain warm color palette	Don't Use cold or institutional colors

Change Log v1.0 → v1.1

Version 1.1 introduces critical updates to enforce dark mode consistency, correct node shape language, and clean up formatting artifacts. All changes maintain the core brand philosophy while improving clarity and implementation guidance.

DARK MODE ENFORCEMENT

- Enforced strict two-mode-only rule: Light (default) and Dark modes exclusively
- Removed all references to theme customization, accent pickers, and user-customizable color packs
- Added Principle 6: "Two-Mode Only" to design principles for consistency and cognitive continuity
- Updated dark mode color mapping with elevated accent (#D4956B) for improved contrast

NODE SHAPE CORRECTIONS

- Changed paper nodes from circular to timeline card/box model (70x50px with 4px radius)
- Clarified concept nodes as smaller chips/satellites (45px circles) associated with papers
- Removed force-directed bubble language; emphasized graph-first, readability-first approach

FORMATTING & CLEANUP

- Removed corrupted characters and encoding glitches throughout document
- Normalized headings, bullets, and section spacing for consistency
- Cleaned up placeholder contact information (removed support@aimind.example)
- Updated version and contact section with neutral, implementation-focused guidance

NEW CONTENT

- Added Implementation Quick Spec slide with color tokens, typography, spacing, and do/don'ts
- Added Change Log slide documenting all v1.0 to v1.1 modifications
- Replaced future-roadmap slide with engineer-focused implementation guidance

VERSION SUMMARY

- v1.0:** Initial brand identity guidelines with six design principles, color system, typography, and graph visualization concepts.
- v1.1:** Refined guidelines with dark mode enforcement, corrected node shapes, cleaned formatting, and added implementation quick spec for engineering teams.

Future Considerations

The AI Mind visual identity is designed to evolve thoughtfully. These considerations outline potential expansions that maintain core principles while adapting to future needs and user contexts.

Extended Palette

Potential expansion of the color system to support more complex information hierarchies and data visualization.

- Additional accent colors for data categories
- Status colors (success, warning, error)

Animation System

Motion design system that brings the interface to life while respecting user preferences.

- Easing curves for interactions
- Micro-interactions for graphs

Internationalization

Support for multiple languages and cultural contexts while maintaining visual consistency.

- Typography for non-Latin scripts
- RTL language support

EVOLUTION ROADMAP

1

Foundation

Core brand identity established.

2

Refinement

User feedback integration.

3

Expansion

Extended palette and motion system.

4

Globalization

Multi-language support.

EVOLUTION PRINCIPLES

Any future evolution must maintain the **six core design principles**: Graph First, Readability Second, Warmth Always, Consistency, Accessibility, and Two-Mode Only. Growth should enhance the brand, never dilute it.

FINAL THOUGHTS

A Visual Identity for Learning

The AI Mind visual identity is more than a collection of colors, fonts, and shapes. It is a **commitment to making complex knowledge accessible, beautiful, and personal.**

Scholarly

Intellectual rigor and careful craftsmanship in every detail

Warm

Inviting and human, never cold or intimidating

Accessible

Designed for all users, with clarity and inclusivity

THE PROMISE

*Every design decision in this visual identity system serves a single purpose: **to support users in their journey of understanding AI history and building their personal knowledge graph.** The interface should feel like a trusted companion — scholarly enough to be authoritative, warm enough to be welcoming, and clear enough to never get in the way of learning.*

This visual identity is a living system that will adapt while maintaining core values of **clarity, warmth, and accessibility**. Use these guidelines as a foundation.

Version & Guidelines

DOCUMENT TITLE

AI Mind Brand Identity Guidelines

IMPLEMENTATION SUPPORT

v1.2 → v1.3 Updates

Final Polish: Removed all encoding artifacts, updated remaining principle count references (five → six with Two-Mode Only), ensured consistency across all pages. No content changes beyond artifact cleanup and wording.

Implementation Support

Refer to the Implementation Quick Spec and Change Log sections for guidance. For technical implementation questions, consult the relevant specification slides.

Brand Consistency

Record any intentional deviations from these guidelines. All design decisions should be evaluated against the six core principles.

*The AI Mind visual identity is a **commitment to making complex knowledge accessible, beautiful, and personal**. Design decisions should serve this mission and protect the brand integrity.*
